

Theme options

Choose one of the following themes and design your website based on that theme:

1. Cinema
2. Circus
3. Art gallery
4. Videogames shop
5. Pet shop

After choosing a theme, you'll need some assets to build the website. Retrieve the contents of the challenge folder in the repo and respect the structure already in place.

Access the contents in the assets/images folder and get a different image for every element inside the catalog folder, create a logo for the logo folder and finally create a default profile picture for the profile folder.

Use the existing style.css stylesheet to do some general styling on the website and create a new stylesheet with an appropriate name depending on the theme you chose. For example, circus.css

Design requirements

Content Structure

The website must have the next sections:

- Welcome page
- Gallery / Catalog page
- About us page
- Contact us page

The Gallery / Catalog page must only be accessible by logged in users.

HTML Structure

Inside each section, all the pages must share the same structure and design:

- Header with the logo at the left, navigation at the right and in case of a logged in user, a profile picture in the rightmost part of the navigation.
- A footer with the logo at the left, random legal links to the right and a copyright text at the bottom.
- The main content will have a main section to display a big poster and a log in form in case a visitor enters the page.
- The main content will display some posters and a sign out button in case a registered user enters the page.
- The Gallery / Catalog page will have all the posters available at the moment displayed with some extra information about the poster on the side.
- The About us page must have the next title: About Us
- The about us page must have the next content:

- Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.
- The about us page should display a generic image from the internet displaying a group of people smiling. You're free to get any placeholder image.
- The contact us page should have the next title: Contact Us
- The contact us page should have the next content:
 - Feel free to send us a message and we'll reply as soon as we can.
- The contact us page should have a basic form that asks for an user email, subject and a textarea element to write some comments. At the moment this contact form can stay inactive.

Functionality requirements

Sign up and sign in

- In the main page, in the form add the possibility to use it to register new users.
- Register the new users in a local array of users.
- When an existing user in the local array logs in using the form, store its credential using the sessionStorage local storage.
- When the user is logged in, show the Gallery / Catalog link in the navigation menu.
- When the user is logged in, display the profile picture aside from the navigation menu.
- When the user is logged in, replace the big poster for the available posters.
